Amendments to the Specification:

Please amend the text of the original application beginning on page 4, at line 19 (paragraph [0015] of published application 20010015732), as follows:

According to FIG. 2 , which shows another representation of the GUI **10**, the present communication procedure has the name Gateway ⎯ 1, as shown in field **23**. Taking part in the procedure is a first instance TC ⎯ 1, according to field **25**, and a second instance IUT ⎯ 1, according to field **27**. According to field **29a** the emulated protocol is of the type "isdnl2" ~~"isdn12"~~, with field 29b offering further protocols from which to choose. In field **30** various communication procedures that may be chosen for further processing may be offered. Buttons **12, 14, 22, 24, 26, 28** described with reference to FIG. 1 appear again in similar form and with similar functions.

Please amend the text of the original application beginning on page 6, at line 1 (paragraph [0020] of published application 20010015732), as follows:

Returning to FIG. 5 as an example of a part of the communication procedure shown in field **48** , an instance is awaiting, initially alternatively, the ASPs DL_ESTABLISH_CNF ⎯ 1 or DL_ESTABLISH_IND ⎯ 1. Next a timer T_Waitinit with a five (5) second <u>duration</u> ~~duratioin~~ is started and the elapsing of the time is awaited.
